## **Problem-Solution Fit canvas**

CS CL AS 1. CUSTOMER SEGMENT(S) 6. CUSTOMER LIMITATIONS EG. BUDGET, DEVICES 5. AVAILABLE SOLUTIONS PLUSES & MINUSES fit into What limits your customers to act when problem occurs? Which solutions are available to the customer when he/she is facing Who is your customer? eg. working parents of 0-5 y.o. kids Spending power, budget, no cash in the pocket? Network connection? the problem? What had he/she tried in the past? Pluses & minuses? Available devices? Customers queries not understand Customer must have a smart by the the bank so, we need to The bank customers who have phone or laptop with internet feed more number of queries to questions connectivity the bot PR RC BE 7. BEHAVIOR + ITS INTENSITY 2. PROBLEMS / PAINS + ITS FREQUENCY 9. PROBLEM ROOT / CAUSE How often What does your customer do about / around / directly What is the root of every problem from the list? How often does Which problem do you solve for your customer? or indirectly related to the problem? There could be more than one, explore different sides. does this eg. People think that solar panels are bad investment right now, because they are too this related eg, existing solar solutions for private houses are not considered problem expensive (1,1), and possible changes to the law might influence the return of eg. directly related: tries different "green energy" behavior a good investment (1). occur? investment significantly and diminish the benefits (1.2). calculators in search for the best deal (1.1), usually chooses happen? for 100% green provider (1.2). indirectly related: volunteering work (Greenpeace etc) Bot should crisp answer to the customer like, 1. Customers have to 1. Time restrictions of bank 1.queries about account creation physically visit the bank opening hours to rectify own problem 2. queries about loan 2. customers go to the bank to 2. Easy to access solve his problem 3.general query TR SL CH 3. TRIGGERS TO ACT 10. YOUR SOLUTION 8. CHANNELS of BEHAVIOR If you are working on existing business - write down existing solution first, fill in Bot Should be able to answer the Extract online & offline CH of BE the canvas and check how much does it fit reality. Extract channels from Behavior block all the common queries. Easy to If you are working on a new business proposition then keep it blank until you fill use They get the solution from in the canvas and come up with a solution that fits within customer limitations, Should be able to answer the all online through our bot solves a problem and matches customer behaviour. the common queries. Easy to use Al chatbot for banking **EM** 4. EMOTIONS BEFORE / AFTER industry which helps resolve Extract channels from Behavior block and use for customer development the issues of offline banking. Which emotions do people feel before/after this problem is solved? This solution allows improved Use it in your communication strategy. eg, frustration, blocking (can't afford it) > boost, feeling smart, be an example efficient support, reduced wait Customer go to the bank to get a for others (made a smart purchase) time, cost-effective 24/7 solution support frustrated, angry > relieved, relaxed
